La Delicia came to Caterkwik for a full Cafe kitchen refit...

We refitted our entire cafe with stock from Caterkwik primarily due to price.

The service received from Charlotte was also first class and even though we had delivery issues where one of the counter fridges was missing it was dealt with efficiently and the minimum fuss.

In regards to the Polar counter fridges I would point out that people take note of the weight of and the kerbside delivery as these items are packed in wooden crates and require a crowbar or similar to open, thankfully ours arrived on a sunny day as we couldn't get them through the doors.

The dimension details on the site don't include the packing crates so bear in mind.

Once we had unpacked everything the installation was relatively straightforward and all of our kit was on wheels which makes life a lot easier.
